This Student Handbook details information about HDSP program requirements (including the core curriculum, trial research, course outline or guided literature review, and dissertation), arranged chronologically from what students should know before entering the program, through a hypothetical five-year course program, to what happens after students graduate. The appendices expand upon these topics with a list of professional conferences and fellowship opportunities, the annual Student Progress Report, and relevant courses outside of the department. The handbook also details HDSP academic requirements and expectations in line with those of The Graduate School.

The Doctoral Program in Human Development and Social Policy

The doctoral program in Human Development and Social Policy (HDSP) focuses on understanding human development from infancy through adulthood, with an emphasis on the role of the contexts, programs, policies, and politics that influence the course of human lives, and how an understanding of human development informs programs and policies.

HDSP is one of three doctoral programs in the School of Education and Social Policy on the Evanston campus of Northwestern University. The SESP Doctoral Student Affairs Team consists of Director of Doctoral Support Megan Redfearn, and Program Administrator Karen Kellams. Megan is in Room 243 of Annenberg Hall (2120 Campus Dr., Evanston, IL, 60208) and can be reached at (847) 467-6519 or m-redfearn@northwestern.edu. Karen is in ANN 254 and can be reached at (847) 467-2819 or karen.kellams@northwestern.edu. Professor Cynthia Coburn, Program Coordinator, is in ANN 315 and can be reached at cynthia.coburn@northwestern.edu.

Things to Know Before You Begin

ORIENTATION

The Graduate School (TGS) and HDSP have separate orientation dates. Information regarding the Graduate School’s Orientation can be found in the Admissions section of the Graduate School’s website. Information regarding the HDSP new student orientation will be sent by email. Additionally, information regarding HDSP students’ WildCARD, U-Pass and other graduate student services can be found in Community and Campus Life section of the TGS website.

HEALTH INSURANCE

Upon arriving to campus, students must enroll in the student health plan or provide proof of their own health insurance. More information about dental and health insurance, including start dates and enrollment procedures, can be found in the Health Insurance section of the TGS website.

COMMUNITY

HDSP students and faculty arrange a variety of activities to build intellectual community and to promote better communication and collaboration on Tuesdays throughout each quarter. Please plan on being available every Tuesday during the regular academic year and regularly attending HDSP colloquia and events.

HDSP students and faculty also attend regular presentations across campus, including:

- Institute for Policy Research (IPR)
- Multidisciplinary Program in Education Sciences (MPES)

Brown bags/presentations hosted by Learning Sciences, Psychology, Sociology, Anthropology, Economics, Political Science, etc. Some of these presentations take place weekly, while others occur only once or twice per quarter. Please contact these departments or visit their websites for more information.
Things to Keep in Mind Throughout the Program

INSTITUTIONAL POLICIES AND RESEARCH INTEGRITY

Please familiarize yourself University offices and their policies.

All HDSP students are expected to adhere to University policies regardless of program standing, and physical presence on/off campus. These policies include, but are not limited to Academic Integrity, Civility Safety at Northwestern, and sexual discrimination, sexual harassment and sexual violence under Title IX. Additional information regarding these and other policies can be found at the Office of the Provost.

From TGS Satisfactory Academic Progress page, you will also find links to the TGS Academic Integrity Policy, the Office for Research Integrity, the Office of Equal Opportunity and Access, in addition to the NU Student Handbook.

ADVISING

Every student in HDSP must have an academic advisor(s). All entering students are assigned an initial faculty advisor and this person usually remains the advisor until the student has selected an advisor for the trial research requirement (explained below). In assigning initial faculty advisors to students, we in no way expect that this person will remain the student’s advisor for their entire program of study. Indeed, we encourage students to change to advisors that best fit their particular research interests. Co-advising arrangements are also acceptable. A student’s advisor must be a tenured or tenure-track member of the HDSP faculty.

Students may change advisors at any time if they find a professor more suited to their intellectual interests. Students should discuss these changes with their current and new advisor, and then report such changes to the SESP Doctoral Student Affairs Team by using the Change of Advisor Petition in Appendix I and updating the information in the Graduate Student Tracking system. The approval of both the current advisor and new advisor must be given ahead of the student submitting the Change of Advisor Petition to the SESP Doctoral Student Affairs Team. Students must have an advisor at all times in order to continue in the program; a new advising relationship must be in place prior to terminating a relationship with a current advisor.

Students should meet with their advisor(s) often, especially at the beginning of each quarter, to plan their courses and research and to discuss their progress. Regardless of who the official advisor is at any particular time, all HDSP faculty members can give intellectual and career advice, and graduate students are encouraged to seek this out.

ANNUAL REVIEWS

The HDSP faculty meets annually to review the progress of all students who are not in candidacy. One basis for this review is the Student Progress Report (see Appendix II), which students complete and discuss with their advisors near the end of each academic year. Students will be notified in writing about this annual review by the end of spring or beginning of summer quarter.

FUNDING

All students receive funding as outlined in their official offer letters. Typically, this involves a guarantee of funding for five years of doctoral study through a combination of graduate fellowships, teaching assistantships, and research assistantships.
• First year students are supported on fellowships.

• Beyond the first year, students should meet with their advisors in the Winter and/or Spring quarter of each year to determine the nature of their funding (RA, TA, or internal or external fellowship) for the subsequent year. A letter confirming funding for the subsequent academic year will be sent each summer.

• Students interested in being considered for dissertation year funding should alert the SESP Doctoral Student Affairs Team by spring quarter of the preceding year. To qualify, the student must meet The Graduate School’s prospectus milestone prior to the beginning of the first quarter of dissertation fellowship funding.

• Please refer to the TGS milestone requirements.

• Students are encouraged to apply for external funding opportunities. Search for fellowship opportunities through The Office of Fellowships Fellowship Finder. The possibility of funding after the fifth years is determined on a case-by-case basis. (See Year 6 and Beyond for further information.)

TEACHING REQUIREMENT

The HDSP program requires that students complete two quarters of training as a Teaching Assistant (TA). Many students choose to fulfill this requirement during their second or third years (although they may fulfill it at any time after the first year).

Students should speak with faculty about their undergraduate courses and decide which one interests them the most. Preferred TA assignments may not always be available.

Together, the student and course professor will determine the TA’s responsibilities which require about 5-7 hours per week outside of class time.

Students who are funded for the quarter on a TGS graduate assistantship will be assigned TA duties in fulfillment of their funding requirements. Other students may be eligible to earn approximately $2,000 per quarter for their work.

Upon completion of the TA requirement, students should note this in their annual self-assessment.

EXTERNAL EMPLOYMENT POLICY

Graduate students are expected to be full-time students conducting their studies and research. On occasion another funding opportunity may arise. When that situation occurs, permission to receive remuneration must be requested.

A Graduate Student Permission to work Request Form is required when students are receiving additional pay if any of the following conditions are met:

1. The graduate student’s service exceeds 10 hours/week.
2. The graduate student’s period of service exceeds one month.
3. The requested compensation is greater than or equal to $600.

If any of the above conditions are met, complete the form and submit it via one of the below methods. The form should be submitted BEFORE the work begins. More information on outside employment can be found here.
TRAVEL GRANTS

SESP Conference Travel Grant

HDSP students are eligible to receive up to $400 per academic year (September 1 – August 31) to attend a conference. To apply, students must complete a SESP conference travel funds request form and have it approved by the SESP Doctoral Student Affairs Team. SESP conference travel funds do not rollover from year to year. Students may apply multiple times per academic year up until the $400 per academic year limit is reached. SESP conference funds will not be awarded retroactively. Students must apply 30 days in advance of the first day of travel. When students are not permitted to travel because of safety concerns, this money may be able to be used for professional development (e.g. virtual conferences, software, research expenses).

TGS Conference Travel Grant

This internal grant is available on an annual basis to students beyond their first year of study. The grant funds travel to conferences in which students have been invited to present. Funding must be partially covered through other university sources (e.g., departmental support). Maximum grant is $800. Students are eligible for only one Conference Travel Grant award per fiscal year with a maximum of two grants over the entire course of their graduate career. Grants are awarded on a rolling basis. Additional details regarding this grant can be found here.

Requirements for the PhD in Human Development and Social Policy

COURSE WORK REQUIREMENTS FOR STUDENTS ENTERING FALL 2020 AND BEYOND*

Course work in the Human Development and Social Policy (HDSP) doctoral program includes a core curriculum and electives.

- A total of 21 courses are required for students entering without a master’s degree, including 14 required courses and 7 electives.
- For those who have obtained a master’s degree prior to entering HDSP, a total of 18 courses are required, including 14 required courses and 4 electives. No more than 3 electives may be independent studies (HDSP 499).

Many HDSP courses are offered only every other year. Students with completed master’s degrees must take this into consideration if they wish to complete their coursework in two years. Contact the SESP Doctoral Student Affairs Team for a rough list of courses to be offered each quarter.

*Current students who began the program prior to Fall 2020 may opt into the new requirements.

COURSE WORK REQUIREMENTS FOR STUDENTS ENTERING BEFORE FALL 2020

Course work in the Human Development and Social Policy (HDSP) doctoral program includes a core curriculum and electives.

- A total of 27 courses are required for students entering without a master’s degree.
- For those who have obtained a master’s degree prior to entering HDSP, up to 9 courses may be counted toward the HDSP coursework requirement as electives, leaving students with a total of 18 courses to complete.
• Students seeking to waive elective course requirements must submit their request in writing to the Program Coordinator along with the corresponding course descriptions and transcripts. Refer to the Petition for Elective Course Waivers form, Appendix IV. Student must obtain the written support of their academic advisor before requesting a waiver. Core course requirements may only be waived when a student makes a compelling argument in support of such request and has the written support of their academic advisor.

GRADE POINT AVERAGE AND COURSEWORK COMPLETION

In keeping with Graduate School requirements, all students enrolled in a doctoral program must maintain a grade point average of “B” or better for all credit bearing graduate courses not taken on a pass/no credit (P/N) basis. Failure to maintain a “B” average will result in TGS placing the student on Academic Probation. More detailed information regarding the TGS grading system and Satisfactory Academic Progress can be found on the TGS website.

Should a student fail to maintain a “B” average, or does not complete required coursework in a timely manner, the student shall, along with the approval of his/her advisor, submit in writing to the Program Coordinator a plan of remediation that will detail the steps the student will take in order to restore the student to “good standing”. Failure to comply with the Graduate School’s timeline for resuming satisfactory academic standing after at most two probationary quarters (excluding summers) the student will become ineligible to receive financial aid and will be excluded (dismissed) from TGS.

(See Appendix V for Degree Requirement Audit for Students enrolled Prior to Fall 2012 and Appendix VI for students Enrolled Fall 2012-Fall 2019. Each student is responsible for staying on-track in accordance with TGS and HDSP Milestone requirements.)

Core Curriculum

Students who enter the program in or after Fall 2020 are required to take this core curriculum:

HDSP Overview:
   HDSP 401  Proseminar in Human Development and Social Policy

Foundations in Human Development:
   HDSP 413  Theories of Human Development
   AND 3 OF THE FOLLOWING 4:
   HDSP 402  Child Development
   HDSP 403  Adolescent Development
   HDSP 404  Adult Development and Aging
   HDSP 415  Nature – Nurture Revisited

Foundations in Empirical Research Methods:
   HDSP 410  Quantitative Methods I: Probability and Statistics
   HDSP 411  Quantitative Methods II: Regression Analysis
   HDSP 412  Quantitative Methods III: Empirical Tools for Causal Quantitative Analysis
   HDSP 432  Field Methods
   HDSP 435  Advanced Field Methods
Foundations in Social Policy: Students must take four courses from the following:

- HDSP 430 Economics of Social Policy
- HDSP 429 Social-Community Interventions
- HDSP 451 Organizations, Institutions and Society: Persistence and Change Among Public
- HDSP 428 Educational Policy: Design, Implementation and Effects
- HDSP 427 Sociology of Education
- HDSP 433 Modern Theories of the State and Social Policy
- HDSP 442 Social Policymaking and Policy Implementation

Students who enter the program prior to FALL 2020 are required to take the following core curriculum or opt into the new requirements.

HDSP Overview
- HDSP 401 Proseminar in Human Development and Social Policy

Foundations in Human Development
- HDSP 413 Theories of Human Development

AND 3 OF THE FOLLOWING 4:
- HDSP 402 Child Development
- HDSP 403 Adolescent Development
- HDSP 404 Adult Development and Aging
- HDSP 415 Nature – Nurture Revisited

Foundations in Empirical Research Methods
- HDSP 410 Quantitative Methods I: Probability and Statistics
- HDSP 411 Quantitative Methods II: Regression Analysis
- SOCIO 404 Designs for Descriptive Causal Research in Field Settings
- HDSP 432 Field Methods

Foundations in Social Policy
Students must take one course from each of the following groups:

GROUP 1
- HDSP 430 Economics of Social Policy

GROUP 2
- HDSP 429 Social-Community Interventions
- HDSP 451 Organizations, Institutions and Society: Persistence and Change Among Public, Private and Non-Profit Sectors

GROUP 3
- HDSP 428 Educational Policy: Design, Implementation and Effects
- HDSP 427 Sociology of Education

GROUP 4
- HDSP 433 Modern Theories of the State and Social Policy
- HDSP 442 Social Policymaking and Policy Implementation

Students who entered the program prior to fall 2012, please refer to Appendix IV.
BEYOND THE CORE CURRICULUM

Students will also specialize in their area of interest (taking classes both within and outside of HDSP) in order to develop a strong intellectual identity that is recognized by specific aspects of the job market. This should be done in consultation with students’ advisors, other faculty, and more advanced students. See Appendix VII.

In addition, students have the option of completing an independent study (HDSP 499) under a HDSP faculty member. A first-year graduate student may take no more than one-half of the total credits in any one quarter in 499 Independent Study or 499 Projects. No more than one-third of the total units presented for the master’s degree may be 499. For students following the Fall 2020 requirements, no more than 3 electives may be Independent Studies.

After completing coursework, all students must maintain full time registration until completion of the program. Advanced students who are funded should register for TGS 500 in order to maintain their full-time student status. Students can continue to take additional courses, but if they are taking fewer than 3 courses per quarter, they must also register for TGS 500 to be considered a full-time student.

WHAT TO DO IN SUMMER

Students do not take coursework during the summer quarters, but if they are receiving funding, they must register one of the following to maintain their full-time student status:

- TGS 590 Research (for the summers following the 1st and 2nd years of coursework)
  
  or

- TGS 500 Advanced Doctoral Study (all summers after the 3rd year)

Students should work with their advisors and be involved in research over the summer.

TGS and HDSP Milestones

There are four major program milestones that all students must successfully meet:

1. The Trial Research
2. Course Outline or Guided Literature Review (qualifying exam)
3. Dissertation Proposal Defense (prospectus)
4. Dissertation (final exam)

Students wishing to schedule their dissertation proposal defense (prospectus) must notify both the HDSP Chair and Program Assistant at least two weeks in advance of the prospectus defense date. Only after the student receives signed approval by the Program Chair may the prospectus defense take place.

Successful completion of the Trial Research and Course Outline OR Trial Research and Guided Literature Review admits a student to PhD candidacy.

Students should rely on the HDSP Handbook and TGS website for information regarding milestone deadlines. Please note TGS’s summer 2020 letter about milestone extensions. Students should be
aware that they might be placed on academic probation if deadlines are missed. Any student placed on academic probation will be given at most two quarters (not including summer quarter) to resume satisfactory academic standing. If the student does not resume satisfactory academic standing, the student will be ineligible to receive financial aid, and will be excluded (dismissed) from TGS. Students who have not met the GPA requirement or exceeded their time to degree deadline, qualifying exam or prospectus milestone deadline, may petition TGS for an extension.

Students should meet with the HDSP Coordinator to discuss extenuating circumstances that may delay progress on their milestone projects (i.e. pregnancy, family emergencies, etc.). If an extended leave is needed, students should use the Petition for Absence form. Both the HDSP Coordinator and TGS will review the request before leave is granted. Refer to the TGS PhD Timeline for definitive TGS Milestone expectations and the TGS website for more information about leaves of absence. Also, see Appendix IX.

**Milestone 1: Trial Research**

In the first year, all students are expected to become involved in lab meetings and at least one research program under the supervision of one or more faculty members. In their second year, students begin work on their trial research — an empirical research project similar in scope to a master’s thesis. The final paper must be approved by both the supervising HDSP faculty member and a second Northwestern faculty member. Many students present their trial research papers at professional conferences and publish their work in academic journals. Some have won national awards for their work.

Throughout their second year, students should engage in research related to their particular interests, working closely with their advisor(s) to hone their research interests and skills. Once the student has identified a research question(s) — as well as an empirical dataset (whether primary or secondary) to investigate that question — they are ready to begin the trial research project.

The purpose of the trial research requirement is to provide evidence that the student has had adequate training and experience in designing and carrying out a research project — and is now ready to begin planning the doctoral dissertation. The trial research may be on a similar or different topic than the dissertation.

The length and format of a journal article is typically 30-60 pages, double-spaced. The trial research paper addresses questions that can be answered through empirical, feasible investigations (please note that neither a critical review of the literature on a topic nor a speculative essay is acceptable).

The final paper should include the student’s:

- Research questions
- Conceptual framework and review of prior literature
- Methods of data collection
- Results
- Discussion, conclusions, interpretations, and suggestions for further research
- Citations, figures, tables.
A SUGGESTED TIMELINE MIGHT BE:

<table>
<thead>
<tr>
<th>SPRING/SUMMER FIRST YEAR</th>
<th>SECOND YEAR</th>
<th>END OF SECOND YEAR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Meet with advisor and/or other HDSP faculty to identify potential trial research questions that can be answered using one or more social/ behavioral science research methods. If question is identified early, begin work on trial research over the summer.</td>
<td>In conjunction with advisor, work on and complete the trial research project. In consultation with your advisor, choose a second reader to review the project, and enquire whether the reader would like to be involved in the research design and analysis phase. Otherwise, provide the final draft of the project for their review and approval.</td>
<td>Once the advisor has approved the trial research project, provide the paper to your second reader to review. The two readers and HDSP Program Coordinator must sign a form testifying to the satisfactory completion of the requirement; students are responsible for obtaining and remitting the form to the SESP Doctoral Student Affairs Team.</td>
</tr>
</tbody>
</table>

Students may petition the SESP Doctoral Student Affairs Team, with the support of their academic advisor, to submit an M.A. thesis completed elsewhere, or another published or unpublished paper, as their trial research. Together with their advisor, they will determine if this previous work (either as is, or with additional revision) is acceptable. The paper is subject to the same requirements as the trial research. The review of this paper will be identical to that of an original trial research.

Students should successfully complete the trial research by the end of their second year of study, which falls on the last date of the 8th quarter. Upon successful completion of the Trial Research, the student will fill out the Completion of the Trial Research form (see Appendix IX) and submit it to the SESP Doctoral Student Affairs Team.

An MA in Human Development and Social Policy may be awarded after completion of the required core courses, and successful submission of the Trial Research paper. An MA may be awarded to students continuing on to completion of the PhD, or to students leaving the program for any reason, provided they have satisfactorily completed the core coursework and Trial Research paper, maintain at least a “B” average, and meet all other TGS and HDSP requirements. See MA Degree requirements and Appendix IX.
Milestone 2: Course Outline or Guided Literature Review (TGS Qualifying Exam)

Virtually all PhD programs have a qualifying examination whose purpose is to assure that the student has mastered the broad content of the field and is now ready to proceed to dissertation stage in the program. For some programs, the qualifying examination is an actual in-class or take-home written exam. For other programs, it is a comprehensive review paper that aims to synthesize theory and research in a given area.

There are currently two mechanisms by which the qualifying examination may be achieved in HDSP: The Course Outline and the Guided Literature Review (GLR). It is up to the student, in consultation with their advisor, as to which ONE of these two options they choose to complete. Once the coursework and trial research requirements have also been met, passing either the GLR or the Course Outline serves as completion of the qualifying exam requirement and allows the student to advance to PhD candidacy.

The Graduate School deadline* for the completion of the Qualifying Exam is the beginning of Fall quarter of the student’s 4th year in the HDSP graduate program. A student failing to meet this deadline will be considered “not in good standing” and therefore will be placed on probation. Deadlines may only be altered in the case of a medical or family leave, requiring that a petition for deadline extension be submitted to and approved by TGS. See Appendix IX.

Upon successful completion of the Qualifying Exam, students are required to notify TGS that all requirements for the Qualifying Exam have been met. See Appendix IX.

* See July 2020 letter regarding Milestone Deadline Extension

WHAT IS THE COURSE OUTLINE?

Students are required to design an integrative course they would want to teach and to develop a syllabus complete with topics, rationale and reading list. The course outline is structured as an extended syllabus for an integrative course. Copies of selected HDSP course outlines from past years can be obtained from the SESP Doctoral Student Affairs Team.

Course Outline Summary

- Course topic should be focused enough so that it might be well-covered in a quarter-long (approximately 11-week) or semester-long (approximately 14-week) undergraduate- or graduate-level course, but broad enough to allow the student to integrate perspectives from both the human development and the social policy sides of HDSP.

- Student must provide a week-by-week listing of topics and readings, and it should discuss in some detail how those topics and readings will be discussed along the way.

- It should be designed to encourage critical thinking and development of an argument by the hypothetical students in the course and should incorporate ideas that come from research, theory, and policy considerations.

- Outline should be no more than 30 pages in length and double-spaced.

- Students should work with their advisors and faculty to develop their outline.
Course Outline Assessment Process

1. The completed course outline should be submitted to the SESP Doctoral Student Affairs Team who will distribute name-redacted copies to the Program Coordinator and a committee made up of approximately half of the HDSP faculty.

2. Committee members will read the course outline and submit comments/evaluations to the Program Coordinator.

3. The Program Coordinator will prepare a letter to the student, synthesizing the comments and providing an overall evaluation, much as an action editor might do in synthesizing the different reviews of a manuscript.

   a. Because the first submission is often not satisfactory, a student could be asked to either write a letter explaining how they would respond to reviewers’ concerns or revise and resubmit the original course outline to address critiques. The letter or revised course outline will be reviewed by the Program Coordinator and in some cases a subset of the faculty who reviewed the original submission.

   b. If the student’s revised course outline does not receive a passing grade or if the letter does not address the reviewers’ concerns adequately, the student will be asked to start over and submit a new course outline.

   c. The evaluation of this new Course Outline will be identical to the evaluation process described above.

   d. If the review committee determines that the new Course Outline fails to meet standards, the student, along with his/her academic advisor, shall submit in writing to the Program Coordinator, a detailed plan of remediation, with remediation goals the student must in order to complete the Course Outline requirements. Should the student fail to submit an acceptable Course Outline after remediation, the student is subject to exclusion (dismissal) from the Graduate School.

GUIDED LITERATURE REVIEW

This assignment serves as an alternative to the Course Outline qualifying exam option. Once the coursework and trial research requirements have also been met, passing the Guided Literature Review serves as completion of the qualifying exam requirement and allows the student to advance to PhD candidacy.

Guided Literature Review Summary

To pass the Guided Literature Review (GLR) qualifying exam requirement, students must write a paper that demonstrates:

   a. A mastery of the literature pertaining to a key research area within human development and social policy

   b. The ability to synthesize and critique a literature

   c. The ability to craft an argument

   d. An awareness of multiple (within/across disciplines) approaches to this research area
The GLR may overlap with — but must be distinct from — the Trial Research Project and Dissertation. The GLR must reflect on both Human Development and Social Policy in enough depth to demonstrate understanding of each approach to inquiry.

The GLR is open to all HDSP students, and can be completed at any time, including prior to the completion of the Trial Research. The GLR and Trial Research must be completed before the student proposes their dissertation.

6 Steps to Completing the Guided Literature Review

1. The student will select a topic of relevance to human development and social policy.
   - Research topics should be narrow enough to synthesize a set of relevant literatures in 30 pages, but broad enough to bring together different methodological and disciplinary perspectives from the study of human development and social policy.
   - Examples:
     a. The role of policy and program interventions in improving the academic outcomes of low-income youth.
     b. Factors contributing to racial/ethnic or socioeconomic health disparities.
     c. Integration of linguistic minority students into education systems.
     d. Relationship between teacher quality and low-income public schools.
     e. Stress in adolescence: Biological sources and consequences for adjustment.
     f. Socio-emotional development in late life and implications for aging societies.

2. The student will propose a review panel totaling four NU faculty.
   - a. Must include two faculty members who bring diversity in some way to the panel (either being from a different primary discipline than the student, or utilizing very different methodologies or bringing strongly different theoretical perspective)
   - b. Must propose a panel chair.
   - c. At least 3 out of 4 panel members should be from within HDSP.
   - d. The faculty panel composition must be approved by the HDSP Coordinator, with input from HDSP faculty if needed.

3. The student will submit their literature review topic to the committee for approval. In consultation with the committee, the student will develop a reading list that both addresses a broad range of literature on their topic and allows for a critical analysis of the literature. The reading list will contain at least 40 citations, although this figure may be altered depending on the topic and at the discretion of the committee.

4. The student will write the paper independently but will consult the panel, if necessary, at critical points in the writing process.
   - a. The essay should be 25-30 pages long (excluding references), double-spaced, with 12-point font and 1-inch margins.
b. The student and panel will agree on a submission deadline, with a recommended submission date no later than May 15 of the third year, which will allow enough time for revision as determined by the panel.

c. The final date for passing the GLR is August 31 of the third year.

5. The student will submit the final paper to SESP Doctoral Student Affairs Team, who will submit the paper, scoring rubric, and assessment sheets to the panel. The review panel will read and review the student’s manuscript and issue an assessment, including (if needed) suggestions for revision/remediation. The committee chair will convey the committee decision and recommendations to the student and to the SESP Doctoral Student Affairs Team.

6. The student will undertake any revisions/remediation suggested by the panel, until such a time the committee determines that:
   - The requirement has been met and a passing grade can be issued.
   - or
   - Further remediation is no longer fruitful, and a failing grade should be issued.

Guided Literature Review Assessment Process

Each member of the faculty panel will read and assess the student’s essay based on the rubric listed below, and will submit a set of comments and, if needed, a set of requested revisions. The panel will then communicate and combine their individual impressions into a single combined decision and set of comments and recommendations that will be conveyed to the student. The panel will submit to the HDSP Coordinator an agreed-upon GLR revision form with the panel’s recommendation, signed by each panel member.

**High pass:** Literature review meets all the elements described in these guidelines and does so with a high degree of sophistication that adds insights to our understanding of the topic.

**Pass:** Literature review meets all of the elements described in these guidelines. Adequate, but not exceptional; a solid critical review of the literature but doesn’t necessarily add new insights.

**Revise-resubmit-Minor Revision:** Literature review is approaching a passing level, but several points require additional attention or analysis, or some minor re-writing or reorganization of the literature review is required. Minor revisions may be approved by the committee chair.

**Revise-resubmit-Major Revision:** Student has failed to meet substantial elements of this assignment, and a major revision of the literature review is required. Insufficient interrogation or weak analysis of the literature can be grounds for major revision. Major revisions must be re-evaluated by the committee members.

**Fail:** After two rounds of revision (or three, if an additional round or revisions is approved by the committee and the HDSP coordinator), the literature review fails to meet the requirements of this assignment.

Remediation Process

In the event the faculty panel determines that the GLR submission fails to meet a combined grade of Pass, the panel chair will submit a remediation form to the HDSP Coordinator and student, with the
remediation goals the student must meet in order to complete the GLR requirements. Unless a special appeal is made by the committee, and approved by the HDSP coordinator, allowing a third round of revisions, only two attempts at remediation will be allowed before a final determination of pass vs. fail is made by the committee.

Additional GLR Guidelines

**Identify** a topic and state a research problem or question (or set of problems and questions) related to this topic and is relevant to human development and social policy.

**Discuss** the broad social and policy importance of the topic. Explain how the basic science of human development has informed your topic.

**Synthesize and analyze** the important relevant literature on the topic. Where appropriate, draw from a variety of disciplines. Compare and contrast literatures.

*This synthesis should not be a laundry list, nor should it artificially pose literatures as always fitting together or complimentary or telling a seamless story. Rather, it should be a revealing and carefully crafted summary of what we know, how we know it, what we don’t know, and why we don’t know it. This synthesis must discuss and explain how specific theories and research address this topic/research problem, and what gaps remain to be addressed.*

**Interrogate** the claims and quality of the methods.

**Offer critiques** regarding the quality of the literature, including suggestions for improvements, and offer specific suggestions for future research that would help to move our understanding of this topic forward.

**Attempt to adjudicate**, where appropriate, and evaluate the validity of conflicting perspectives and claims. Where such competing claims cross, or occur within disciplines, the student should discuss differences that arise from the different approaches.

**Make an argument** that is derived from the analysis of the literature. The argument should take a firm stance on:

1. The state of knowledge on the research topic
2. What questions have not been answered
3. How we might be able to credibly answer them
**Milestone 3: Dissertation Proposal (Prospectus)**

The student starts the dissertation proposal process by forming a committee that is responsible for evaluating the student’s dissertation proposal and defense.

The committee must include at least three full-time faculty of Northwestern University, two of whom (including the chairperson) must be graduate faculty members. The chairperson of the committee (usually a student’s advisor) must hold a full-time, tenure-line appointment in HDSP.

Usually students approach faculty members during their third year to ask them to be on their committee. Committee members have differing preferences regarding how involved they like to be in the research design and conceptual process. Some faculty members are highly involved; some read and comment of the written proposal. It is best to discuss these preferences soon after the committee is formed.

**DISSERTATION PROPOSAL DEFENSE**

- Once they have obtained written approval from the HDSP Chair and have written a formal proposal, students should submit the proposal to their committee and schedule their dissertation proposal defense (students must submit their written proposal to committee members prior to their oral defense of it).

- After students pass the dissertation proposal defense, they must complete the TGS PhD Prospectus form in GSTS. The form must be signed by each committee member and submitted to the SESP Doctoral Student Affairs team. (See Appendix IX.)

**Approvals and Deadlines**

Dissertation Year Fellowships are contingent on a successful dissertation proposal defense by the summer quarter of the fourth year. Before working on the dissertation, students must be approved by HDSP faculty and The Graduate School. The steps and forms needed to obtain this approval are described below.

Students must have a prospectus (dissertation proposal) approved by their committee no later than the end of the fourth year of study, which falls on the last date of the 16th quarter. A student failing to meet this milestone will be considered not in good academic standing and therefore will be placed on academic probation. Deadlines will be altered in the case of an approved leave of absence or parental accommodation. The prospectus must be approved by a faculty committee. A minimum of three individuals must serve on the prospectus committee. At least two members of this committee, including the chair, must be members of the Northwestern University Graduate Faculty. The student must submit the PhD prospectus form through TGS Forms in GSTS. The program must approve this form online before The Graduate School enters the final approval. Students are notified via email by The Graduate School of approval of their prospectus form.

In the event the review committee determines that the Dissertation Proposal (Prospectus) fails to meet standards, the committee chair, and with the input of the remaining committee members, shall provide comments (either oral or written) during the formal dissertation defense outlining the steps the student must take in order to complete the Dissertation Proposal requirements. Should the student fail to submit an acceptable Dissertation Proposal, the student is subject to exclusion (dismissal) from The Graduate School.

A petition for extension of the Dissertation Proposal deadline may be approved by TGS under certain circumstances, such as medical or family leave. (See Appendix IX.)
Milestone 4: Dissertation (Final Exam)

The most important project of a student’s intellectual career is the PhD dissertation. It is an expanded report and discussion of an original and integrative research program, initiated and carried out by the student in consultation with his or her dissertation committee. In HDSP, the dissertation offers the best opportunity to bring together the different strands of inquiry in human development and social policy within an empirical study or series of studies that addresses an important intellectual issue. The dissertation is the capstone of the graduate-school experience and serves as the student’s entrée into a professional career.

Dissertation Defense

The final exam must be approved by a graduate faculty committee. Students work closely with their advisor in order to accomplish their dissertation and select members of the student’s dissertation defense committee. It is highly recommended that students meet with committee members as well, after consultation with the advisor.

- Per TGS requirements, scheduling the final exam is the responsibility of the candidate and the members of the committee.

- A minimum of three individuals must serve on the final exam committee.

- At least two members of this committee, including the chair, must be members of the Northwestern University Graduate Faculty.

- Once the advisor agrees that the dissertation is ready for a formal defense, the student must schedule the defense so that all committee members can be present.

- Prior to the dissertation defense, students should allow plenty of time (at least three weeks) for the committee to read the final dissertation draft.

- The defense itself usually lasts two or three hours and is not open to the public.

- The student and committee assemble in a designated room, and the student is then asked to leave so that committee members can discuss their reactions to the written dissertation.

- When the student re-enters, he/she takes about 10-20 minutes to present the dissertation’s design and findings, and then committee members ask questions.

- The student is then asked to leave the room again, so that the committee can decide what course of action should take place. Most dissertation committees request some revisions: some are minor; others can require considerable time. (If your defense is to be held in Annenberg Hall, it is advisable to contact the SESP Doctoral Student Affairs Team as to the availability of an appropriate room for your defense. It is best to check room availability prior to finalizing a defense date with your committee members.)

- Depending upon the views of committee members, either the advisor has full responsibility for signing off on the final dissertation, or individual committee members may request that they read the revisions as well.

- The TGS PhD Final Exam form in GSTS must be signed or submitted virtually by each committee member. The form will not be approved until all classes are graded, a final version
of the student’s dissertation is submitted in GSTS and to the SESP Doctoral Student Affairs Team. See the TGS website for more details about graduation. (See Appendix IX.)

Suggested 5-year Program Overview

YEAR 1

- **Get involved in research**: It is highly recommended that students meet regularly with their advisor to discuss courses and professional interests. They may also choose to work with them on their research projects to gain valuable experience. Students are also welcome and encouraged to explore the research interests of other HDSP faculty by working on research projects and/or attending lab meetings.
- Attend HDSP Brownbags and events
- By the end of the first year, most students will have made substantial progress toward solidifying their research interests with an eye toward their Trial Research Project.
- Enroll full-time in classes or TGS 590
- **Apply for external fellowships**: While funding (full tuition and stipend) is guaranteed for five years for all HDSP students, students are encouraged to pursue external fellowships and scholarships. Several of these fellowships provide multiyear funding and are extremely competitive and prestigious. Students should research and prepare their applications early. View a current list of internal and external funding opportunities and speak with your advisor/faculty/fellow students for suggestions. Fellowship Finder provides a database of internal and external fellowships.
- **Identify internal funding opportunities**: Funding is guaranteed for five years for all full-time students, but the source of that funding may vary from year to year or quarter to quarter. After the 1st year in the program, funding is linked to teaching, learning, or research goals. As such, students may receive funding through teaching assistantships, fellowships, TGS interdisciplinary cluster, or research assistantships. During winter or spring quarter of their 1st year, students are encouraged to discuss funding opportunities for the upcoming academic year with their academic advisor.
- **Attend conference(s)**: During the first year, many students attend one or two conferences to help determine which specialty areas best fit their developing research interests. All full-time HDSP students can receive up to $400 per academic year for such travel. Prior to traveling, students must apply for approval (see the Program Assistant for form). Afterwards, students need to fill out an Expense Report (also available from the Program Assistant) and return it with all receipts.
- **Attend workshops/seminars**: There are often seminars and workshops (both within and outside Northwestern) for students who would like to strengthen their methodological skills, or who are interested in using particular datasets. Speak with your advisor and other faculty and students for suggestions.

YEAR 2
● Complete the Trial Research by end of the year
● Enroll full-time in classes or TGS 590
● Attend HDSP Brownbags and events
● Apply for external fellowships (See Year 1)
● Identify internal funding opportunities (See Year 1)
● **Attend/Present at conference(s):** By the second or third year, many graduate students submit proposals to present a poster or paper at national scholarly conferences. In addition to the $400 per academic year available from SESP for conference attendance, up to $800 is available through the TGS Conference Travel Grant for conference expenses in which students (beyond their first year) present papers or posters (totaling a maximum of $1200 per academic year).

● **Fulfill Teaching Assistant (TA) requirement**

● **Investigate opportunities at Searle Center:** [The Searle Center for Teaching Excellence](https://www.ese.purdue.edu/searlecenter) provides a number of workshops and opportunities for graduate students and faculty to expand their teaching skills and effectively meet their teaching responsibilities. In addition, the Searle Center offers a Graduate Teaching Certificate Program, as well as a TA Fellows Program, for outstanding graduate TAs.

**YEAR 3**

- Complete Course Outline OR Guided Literature Review by the end of the year
- Enroll full-time in classes or TGS 500 **NOTE:** Students who have obtained an M.A. degree prior to coming to HDSP (and who have successfully petitioned for course credit) will have completed their coursework. Rather than registering for/taking classes, these students will instead register for TGS 500 each regular quarter indicating that they are working full-time on their research.
- Continue to attend HDSP Brownbags and events
- **Identify internal and external funding opportunities:** At this time, it may be appropriate for students to look for funding specific to their dissertation.
- **Choose dissertation committee:** See information under Year 4 for additional details.
- **Apply for M.A. degree (optional):** The M.A. credential may be obtained en route to the PhD, if desired. To obtain the M.A., students must complete the core curriculum (as described above), in addition to elective courses, totaling 18 courses. In addition, the student’s Trial Research project must also be completed. (See [Appendix IX](#)).
- **Attend/Present at conference(s):** Continue to attend/present your work at conferences.
- Fulfill TA requirement

**YEAR 4**
• Defend dissertation proposal by the end of the 4th year

• **Coursework completed:** All students should have completed their coursework. Rather than registering for/taking classes, students will register for TGS 500 each regular quarter indicating that they are working full-time on their research. Should a student wish to take any class other than TGS 500 during the 4th year, it is allowable with permission from the HDSP Chair.

• **Identify internal funding opportunities:** See previous years.

• Fulfill TA requirement

• Continue to attend HDSP Brownbags and events

**YEAR 5**

• Work on and complete dissertation

• Continue to attend HDSP Brownbags and events, although less frequent attendance is allowed in year 5 and beyond in order to work on dissertation-writing, provided that adequate progress is being made in the program.

**YEAR 6 AND BEYOND**

• Work on and complete dissertation

• **Funding is no longer guaranteed:** Priority is given to students in their first 5 years in the program, but external and internal funding can continue to be sought in consultation with advisor.

• **Coursework completed:** All students should have completed their coursework. Rather than registering for/taking classes, students will register for TGS 500 if receiving funding or TGS 512 is unfunded each regular quarter indicating that they are working full-time on their research.

• Doctoral students must complete all requirements for the PhD within nine years of initial registration in TGS. Students who do not complete degree requirements by the established deadlines will not be considered in good academic standing and will not be eligible for financial aid.

• Continue to attend HDSP Brownbags and events, although less frequent attendance is allowed in order to work on dissertation-writing, providing adequate progress is being made in the program.

*View The Graduate School’s PhD degree timeline here.*

**Nondiscrimination Statement**
Northwestern University does not discriminate or permit discrimination by any member of its community against any individual on the basis of race, color, religion, national origin, sex, pregnancy, sexual orientation, gender identity, gender expression, parental status, marital status, age, disability, citizenship status, veteran status, genetic information, reproductive health decision making, or any other classification protected by law in matters of admissions, employment, housing, or services or in the educational programs or activities it operates. Harassment, whether verbal, physical, or visual, that is based on any of these characteristics is a form of discrimination. Further prohibited by law is discrimination against any employee and/or job applicant who chooses to inquire about, discuss, or disclose their own compensation or the compensation of another employee or applicant.

Northwestern University complies with federal and state laws that prohibit discrimination based on the protected categories listed above, including Title IX of the Education Amendments of 1972. Title IX requires educational institutions, such as Northwestern, to prohibit discrimination based on sex (including sexual harassment) in the University’s educational programs and activities, including in matters of employment and admissions. In addition, Northwestern provides reasonable accommodations to qualified applicants, students, and employees with disabilities and to individuals who are pregnant.

Any alleged violations of this policy or questions with respect to nondiscrimination or reasonable accommodations should be directed to Northwestern’s Office of Equity, 1800 Sherman Avenue, Suite 4-500, Evanston, Illinois 60208, 847-467-6165, equity@northwestern.edu.

Questions specific to sex discrimination (including sexual misconduct and sexual harassment) should be directed to Northwestern’s Title IX Coordinator in the Office of Equity, 1800 Sherman Avenue, Suite 4-500, Evanston, Illinois 60208, 847-467-6165, TitleIXCoordinator@northwestern.edu.

A person may also file a complaint with the Department of Education’s Office for Civil Rights regarding an alleged violation of Title IX by visiting www2.ed.gov/about/offices/list/ocr/complaintintro.html or calling 800-421-3481. Inquiries about the application of Title IX to Northwestern may be referred to Northwestern’s Title IX Coordinator, the United States Department of Education’s Assistant Secretary for Civil Rights, or both.
APPENDIX I: Change of Advisor Petition

HDSP CHANGE OF ADVISOR PETITION

Date:

Student Name: ___________________________  Student ID: ___________________________

Current Advisor Name(s): __________________________________________________________

Proposed Advisor Name(s): _________________________________________________________

I hereby respectfully petition to change my advising situation as follows:

Advisor change description and reason:

Student’s Signature: ___________________________

Current Advisor Signature(s): __________________ / _____________________________

Proposed Advisor Signature(s): __________________ / _____________________________

Approved: ___________________________  Date ___________________________

(Program Coordinator)
APPENDIX II: HDSP Student Progress Report

Please respond to the following questions, which are designed to provide a comprehensive overview of your progress in the program. The questions were developed by the faculty, in consultation with the Program Coordinator’s student advisory group. You should discuss the report with your advisor and then hand it in to the Program Assistant by the specified date. The report will be duplicated, distributed to all faculty members, and discussed at an upcoming faculty meeting. The Program Coordinator will send you an e-mail concerning this discussion; you should plan to meet with your advisor for more extensive feedback. Please attach a HDSP degree requirement audit form with your progress report.

Begin the report with your name and date. Use the bold, underlined phrases as subheadings to organize your report. The report should not be more than 2 pages or so, single-spaced (it may be slightly longer if you have an extensive list of papers under #3). Whatever your stage in the program, there are probably some questions that can be answered very briefly.

1) **What are your current career objectives?** For example, if an academic position is your anticipated first choice, indicate the department(s) in which you would like to obtain a position (e.g., human development and family studies, criminology, educational policy, sociology, psychology) and, if appropriate, the subunit within a department (e.g., developmental program in a psychology department). If two choices are equally attractive to you at present, indicate that.

2) **Indicate your progress toward completing your trial research or dissertation.** If you are working on the dissertation, simply list the title of your trial research, and then discuss current status of dissertation. If you are very far along in your trial research, you should mostly discuss that, but also add a sentence or two indicating progress toward identifying dissertation topic.

3) **List any publications** (in print or accepted), conference presentations (presented or accepted), and grants. Give full citation, including coauthors (in order of authorship). If you are currently writing a paper to be submitted for publication (or are literally on the verge of doing so), list that as well.

4) **Other research/policy experiences.** Briefly indicate involvement in research, policy or other relevant activities not reflected above (e.g., summer internship).
5) Indicate your progress toward completing the course outline or guided literature review. If you have already completed this requirement, list the topic of your course.

6) Which required courses, if any, do you still need to take? [Include here required number of elective courses.]

7) List professional meetings or conferences that you attended over the past year.

8) Indicate how you have met the teaching requirement, or how you would like to satisfy it (i.e., courses you might like to TA for).

9) Any additional comments or information you might like to add, such as concerns, resources you could use, etc.

10) How has being a student in HDSP influenced your intellectual identity? Please provide a thoughtful response as the faculty are genuinely interested in understanding program effects in this area.
APPENDIX III: Degree Requirement Audit

HDSP Degree Requirement Audit for Students Enrolled FALL 2020* and Thereafter
*Current students who began the program prior to Fall 2020 may opt in to the new requirements.

APPENDIX IV: HDSP PETITION FOR ELECTIVE COURSE WAIVERS COURSE WORK

(For Students Matriculated prior to Fall 2020)

Waiver Request

NAME: ____________________  STUDENT ID: ________________  DATE: __________

Course work in the Human Development and Social Policy (HDSP) doctoral program includes a core curriculum and electives. A total of 27 courses are required for students entering without a master’s degree. For those who have obtained a master’s degree prior to entering HDSP, up to 9 courses may be counted toward the HDSP coursework requirement as electives, leaving students with a total of 18 courses to complete. Students seeking to waive elective course requirements must submit their request in writing to the Program Coordinator along with the corresponding course descriptions and transcripts. Student must obtain the written support of their academic advisor before requesting a waiver. Core course requirements may only waived when a student makes a compelling argument in support of such request and has the written support of their academic advisor. Many HDSP courses are offered only every other year. Students with completed master’s degrees must take this into consideration, if they wish to complete their coursework in two years. Contact the Program Assistant for a rough list of courses to be offered each quarter. COPIES OF PREVIOUS INSTITUTION COURSE DESCRIPTIONS AND TRANSCRIPTS BEING PETITIONED FOR WAIVER MUST BE ATTACHED TO THIS FORM, OR PETITION CANNOT BE CONSIDERED. BOTH THE WAIVER REQUEST AND SIGNATURE APPROVAL PAGES MUST BE FILLED OUT AND SUBMITTED.

APPENDIX VII: A Note About Courses Within and Outside HDSP

Students, together with their advisor, should plan a systematic course of study that will help prepare them for preferred post-graduation positions. Many students will seek positions in interdisciplinary academic programs, research institutes, or non-profit organizations. Others may pursue jobs in specific academic disciplines (e.g., sociology) or in an academic unit dominated by a particular discipline. The following are some recommendations for coursework that should provide a stronger set of job-related training credentials. Students should discuss these recommendations with their advisors, other faculty, and fellow students. In addition to searching CAESAR for classes outside of HDSP, other departments frequently list the upcoming year’s course schedule and course syllabi or descriptions on their websites.

Qualitative Methods

The following course is recommended for students who wish to become expert qualitative researchers—i.e., those who wish to thoroughly investigate the processes, or the “how,” of social actions, situations, and contexts.

- HDSP 435: Advanced Qualitative Methods: This course is most appropriate for students who are in the process of analyzing their own qualitative data. Students will explore different theories and epistemologies that inform qualitative work, learning to situate their own work within these traditions.

In addition, a variety of courses that expand upon the ethnographic and observational techniques taught in HDSP include (contact the corresponding departments for more information):

- SOCIOL 410: Comparative Methodology
- SOCIOL 439: Comparative and Historical Sociology
- LRN SCI 428: Observational Techniques and Methods
- ANTHRO 461: Methods of Linguistic Anthropology
- ANTHRO 490: Life History Methods

Quantitative Methods

Following are recommendations for HDSP students who aspire to identify as “quantitative researchers”—as researchers who focus primarily on statistical analyses:

- PSYCH 405: Psychometrics: Described in the bulletin as an “introduction to principles of measurement, reliability, validity and scale construction,” this course is recommended for those working with scale data and covers topics such as factor analysis.
- PSYCH 454: Psychological Measurement Using Latent Variables: This course provides an introduction to the use of latent variables, including structural equation modeling.
- STATS 325: Survey Sampling: This course covers topics such as probability sampling, stratification, and cluster sampling.

Economics

Economics provides a backbone for policy research. Students with backgrounds and strong interests in economics and with the necessary mathematical training are urged to consider taking the
graduate-level theory classes offered by the Economics Department, and to take that Department’s theory preliminary exams. These are very rigorous courses; passing them and, especially, the qualifying exam, should provide an impressive set of credentials when looking for jobs in public policy schools and high-level research institutes (e.g., the Urban Institute, MDRC).

Microeconomics (Econ 410-1, 2 & 3) and Econometrics (Econ 480-1, 2 & 3) are each taught as yearlong sequences. Both require strong mathematical preparation including multivariate calculus, real analysis topics, and linear algebra. These topics are covered in the economics department mathematics review course (Econ 401), taught during the three weeks before the beginning of the fall quarter. The economics prelims are given in June following the conclusion of the spring quarter. Registration for the 410 and 480 courses are open to all students; contact the economics department office for details of the 401 course. Contact the Economics Department’s Graduate Student Program Coordinator for permission to take the prelim exams.

Other recommended courses include:

- ECON 339: Labor Economics
- ECON 341: Economics of Education
- ECON 436: Theory and Practice of Public Finance
- ECON 480-1: Introduction to Econometrics
- ECON 481-1: Econometrics

**Learning Sciences**

HDSP students commonly take courses in the Learning Sciences (LS), our sister program in the School of Education and Social Policy. The three pillars of LS that permeate much of its research and theory are: 1) Social context (e.g., classrooms, schools, home environments, neighborhoods), 2) Cognition (e.g., understanding the processes by which learning occurs), and 3) Design (e.g., curriculum, multimedia, artificial intelligence). Recommended courses include:

- LS 401: Cognition and Learning
- LS 451: Analyzing Educational Policy

**Political Science**

An understanding of political science enables one better to examine the problems and issues of modern political life and to comprehend political behavior more fully. Political science provides a framework for thinking about policy questions, for understanding the policy context in which policy decisions get made, and for examining the politics of policy issues. Recommended courses include:

- POLI SCI 401: Introduction to Political Science
- POLI SCI 402: Conducting Political Research
- POLI SCI 412: Political Participation

**Psychology**

Students desiring a greater background in the human development side of HDSP and psychological methods of inquiry should consider additional coursework in psychology, either in the Department
of Psychology or in Kellogg (particularly the PhD program in Management and Organizations). The Department of Psychology strongly values the norms of laboratory-based scientific inquiry, with courses emphasizing experimental methodologies, careful measurement of well-designed psychological constructs, and quantitative over qualitative analysis. Recommended courses include:

- PSYCH 462: Cognitive Development
- PSYCH 466: Analogy and Similarity
- PSYCH 467: Culture and Cognition
- PSYCH 481: Theories in Social Psychology
- PSYCH 489: Discrimination, Stereotyping, and Prejudice
- PSYCH 494: Theory and Research in Personality Psychology

**Sociology**

Sociologists study the implementation of policy in institutions, agencies, communities, families, and individual behavior. They also can examine the ways social context influences human development. Students who wish to gain knowledge of sociology are urged to consider taking one or more courses in social theory. In addition, the Department of Sociology (and sociologists in Kellogg) offer courses in a number of relevant substantive areas, including stratification, organizations, labor markets, gender, law and society, and comparative/historical sociology. Recommended courses include:

- SOCIOL 420: Cultural Sociology and the Sociology of Culture
- SOCIOL 439: Comparative and Historical Sociology
- SOCIOL 440: Stratification, Race, and Gender
- SOCIOL 476: Practice Evaluation
- SOCIOL 476: Special Topics: Genetics and Society

**Developmental Psychobiology/Health**

A recent strength of the HDSP program and of Northwestern University more generally is a multidisciplinary focus on the biological bases of human development, and the biological pathways by which social contexts “get under the skin” to affect health and developmental outcomes. This emphasis has been formalized in several ways: In the Cells to Society Center (C2S) at the Institute for Policy Research, and in the Graduate Cluster Program on Society, Biology and Health. Many faculty and graduate students involved in this research area are also involved in C2S and the Society, Biology and Health graduate cluster. New courses are frequently being added, but existing recommended courses include:

- Integrative Seminar in Society, Biology and Health
- Beyond Nature vs. Nurture: The Impact of Experience on Biology across the Life Course
- Biology and Social Inquiry
APPENDIX VIII: Completion of The Trial Research

COMPLETION OF THE TRIAL RESEARCH

Name of student:

Student ID:

Title of trial research paper:

This paper satisfies the program’s trial research requirement.

________________________________________       _____________
Faculty (advisor) signature          Date

________________________________________       _____________
Faculty (second reader) signature    Date

________________________________________       _____________
Program coordinator’s signature       Date

Final copy of trial research paper must be electronically submitted to HDSP Program Assistant via email
APPENDIX IX: TGS Forms

The Graduate School (TGS) Contacts

In addition to your faculty advisor, all graduate students are encouraged to contact the TGS Student Services office where capable persons are available to answer questions regarding enrollment, degree deadline, residency, and paperwork that you need to submit during your time at Northwestern as well as to graduate. Click here to reach a TGS Student Services staff member.

TGS Forms Available on GSTS Include:

**TGS PhD Masters Completion**
Purpose: Notifies TGS of student’s successful fulfillment of the trial research requirement.
Date Due: Immediately after successfully completing the trial research.

**TGS PhD Qualifying Exam**
Purpose: Notifies TGS of student’s successful fulfillment of the Course Outline OR Guided Literature Review requirement.
Date Due: Immediately after successfully completing the course outline.

**TGS PhD Prospectus**
Purpose: Notifies TGS of student’s successful dissertation proposal and defense as well as their dissertation committee members.
Date Due: Before the start of the student’s fifth year.

**TGS PhD Final Exam**
Purpose: Notifies TGS of student’s successful completion of dissertation and defense.
Date Due: Immediately before your scheduled dissertation defense.
Notes: You should print this form, bring it to your dissertation defense, and ask your committee members to sign it. Once the form is signed, give it to the Program Assistant.

**Application for Degree**
Purpose: Information on your diploma is based on this form; verification of intention to graduate.
Date Due: Usually the second Friday of spring or fall term

**TGS Petition for Absence**
Purpose: Leave of absence (e.g., family leave, medical leave).
Date Due: Not Applicable
Notes: TGS usually honors petitions, if you have the support of your advisor and program chair.

**PhD Timeline Requirements Available on the TGS Site**

Graduate Faculty legislation states that all requirements for the doctoral degree must be met within nine years of initial registration in a doctoral program, which falls on the last day of the 36th quarter. For students on an approved leave of absence, milestones will be extended accordingly.
